

2025-2026

Spanish Programs

Room 4- Spanish Immersion Classroom will serve children aged three to five years old giving each child an opportunity to learn a second language while they continue to learn academics and grow in all core areas of development so they can succeed in the upcoming years. We will provide a rich, safe, and nurturing environment in which Spanish will be taught naturally, through specific daily classroom activities, materials, and resources. All lessons will be delivered 60% Spanish and 40% English. Three days a week the teacher-directed lessons (circle time and small group activities such as science experiments, math art, and music and movement) will be presented in Spanish. Language and literacy activities like writing and reading, rhyming, songs, etc. will be presented in both English and Spanish.

Room 2- Toddler Spanish Exposure Classroom will serve children aged two to three and half years old. In this classroom the children will be introduced to the basics of the Spanish language, allowing them to be immersed in the language through play, songs, stories, and daily activities, providing them with significant exposure to Spanish from an early age so they feel comfortable with the new language.

BENEFITS OF THESE PROGRAMS

- Acquisition of a second language
- To develop a greater cognitive flexibility, showing increased attention, better memory, and problem-solving skills as well as an enhanced understanding of their primary language
- To improve social and emotional skills
